
Experience

- 2025 – **Data Scientist & ML Engineer (first data hire)**, *Sitch*, via Borlandux LLC
At Sitch — a matchmaking startup replacing swiping with curated candidate lists — I replaced the LLM-only matchmaking pipeline with chat-NLP affinity extraction, GBT match-probability models and greedy b-matching, cutting costs from tens of thousands of USD/mo in OpenAI fees to a handful of bare-metal VMs — while holding human-curated match quality (40% one-sided, $\approx 10\%$ mutual approval) and scaling from 3K to 30K users; I remain its sole maintainer on an hourly consulting basis.
- 2024 – 25 **Scientist, Anti-Fraud Team**, *Muun Wallet*, via Borlandux LLC
Muun, a self-custodial BTC wallet with exchange-grade UX, micro-lends to users at several points of their journey; our team managed the resulting counterparty risk across a global, high-risk userbase while keeping false positives near zero. Real-time incongruity detection plus purpose-built on-chain and Lightning contracts drove ≈ 2 BTC/mo of micro-fraud to essentially zero — over USD 200K/mo at the time.
- 2024 – 25 **Head of Data Science**, *Move 37*, via Borlandux LLC
Led quantitative R&D (team of 4) for a pari-mutuel horse-racing syndicate across LATAM and the USA. I upgraded bet sizing from single-wager fractional Kelly to joint Kelly over correlated wagers, replaced independent-marginal sampling with estimated joint probability distributions for exotic bets. We scaled volume over $2\times$ at stable margins — several US tracks turned EV-positive after takeout — while adding trifectas and superfectas, and expanding to Brazil and Uruguay.
- 2023 – **Owner & Principal Consultant**, *Borlandux LLC*, remote
My single-member ML/statistics consultancy: full-time embedded roles (above) plus shorter engagements. Selected projects: an order fulfillment-time prediction service integrated with the ERP of a US cold-storage warehousing provider, later showcased by the client's CEO at their ERP vendor's annual user conference; and a vendor-decoupling roadmap for Unilever USA's $\approx$ USD 1B/yr, 500K-invoice freight audit and payment operation.
- 2021 – 22 **Engineering Manager, Data Science**, *Jampp*, remote
I led the re-architecture of the prediction stack from a bespoke online FTRL logreg (one global model, expert-only tuning) to batch LightGBM: minutes-long trainings on millions of samples with no logloss regression, unlocking per-client and per-(geo, OS) models. I wrote the team's first career ladder and grew it from 7 to 12 people.
- 2019 – 20 **Senior Data Scientist**, *Jampp*, Buenos Aires
Our team built the conversion-rate prediction system (win rate, CTR, CVR) behind Jampp's RTB bidder: online-SGD GLMs trained on billions of observations, scoring 1M+ auctions per second. The income-optimization engine I co-developed ("[Optimal Bidding: a dual approach](#)", AdKDD 2019; presented at [PyData BA 2019](#)) replaced 100+ per-client bidding problems with a single global objective on Jampp's bottom line. Annualized revenue grew $\approx 4\times$, from $\approx$ USD 15M to 60M+, over my SDS-to-EM tenure.
- 2016 – 19 **Expert Data Analysis Advisor**, *Jefatura de Gabinete de Ministros*, Buenos Aires
I built the data model and ETLs of a BI system integrating National Public Administration systems: payroll for ≈ 400 K civil and military employees, the $\approx$ USD 156B national budget with monthly execution status, and the administration's flagship-project board. I co-wrote [pydatajson](#), a CKAN-metadata library part of the IADB's "[Code for Development](#)" FOSS program.

Teaching

- 2023 – 25 **Teaching Assistant, 1st Class**, *Instituto del Cálculo, UBA*, "Intro to Statistics and Data Science" and "Data Laboratory"; materials open-sourced at [fcen-amateur](#)
- 2021 H2 **External Professor**, *FCEyN & Fac. de Ingeniería, UBA*, "Machine Learning in Graphs" — [lectures](#), [materials](#)
- 2012 – 17 **Mathematical Olympiad Coach** — former international olympiad awardee

Education & Languages

- 2017 – 21 **MSc in Mathematical Statistics**, *Instituto del Cálculo, UBA*, GPA 10.0; [thesis](#) presented, defense pending
- 2009 – 14 **Licenciatura ($\approx$ MSc) in Economics**, *Facultad de Cs. Económicas, UBA*, GPA 8.94, *magna cum laude*, class valedictorian
Spanish (native), English (C2), French & Portuguese (advanced)
